

Maternity benefits that benefit everyone.

\$0 for professional services.

When it comes time to have a baby, the last thing future parents want to worry about is money. With St. Luke's Health Plan, medical expertise provided by doctors, nurses and midwives during childbirth is covered at \$0. As a member, you pay \$0 for OBGYN doctor-related visits and delivery (excluding facility-related costs*). Deductibles may apply first for high deductible health plans.

In addition to making parenthood affordable, our team is working toward improving the overall health of baby and parent throughout pregnancy and delivery. This includes focusing on the patient experience and providing additional care management support for parents with health or lifestyle risk factors. This holistic approach includes support for mental well-being alongside post-delivery support.

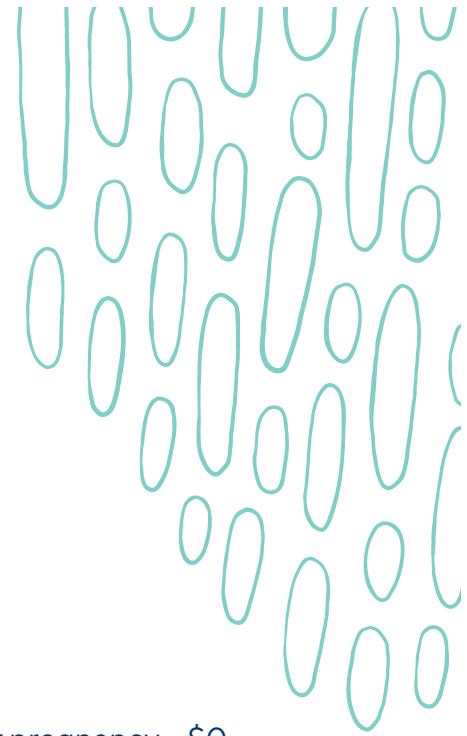

St. Luke's maternity care also offers the following services to patients in addition to their traditional OB visits:

- New Pregnancy On-Demand Virtual Care visit to answer initial questions
- Care Companion app access
- Community education and classes
- Lactation support

Other network providers may offer similar services for parents. Ask your doctor at your next visit what is available to you.

Oh-So-Affordable Maternity Timeline.
