

2024 Network Updates

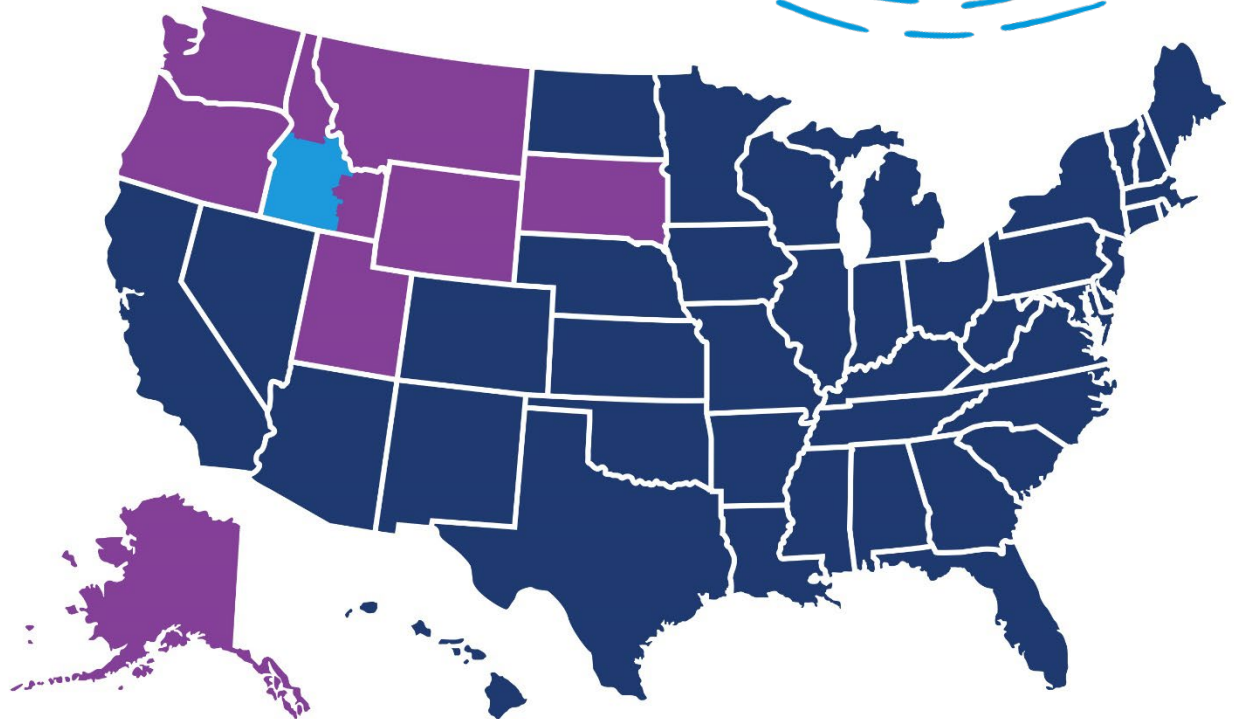

Beginning in 2024, across all lines of St. Luke's Health Plan business, covered services provided within the First Choice Health (FCH) and First Health (FH) networks *will be covered at the in-network benefit level*—the same as care provided within the St. Luke's Health Partners Network. As long as services rendered are covered services, meaning they do not require a prior authorization, members have access to FCH/FH providers in 2024 as in-network.

Members can seek covered services from any provider they choose. To receive the highest level of medical benefit coverage, members must receive care from an in-network or wrap network provider.

Members can scan the QR code on their 2024 ID card or go to the Find a Doctor tool on the Health Plan website.

Coverage Area: When receiving care within the 20 counties, members will utilize St. Luke's Health Partners. When traveling or receiving care (emergent and non-emergent care) out of the 20-county service area, FCH and FH will be at the in-network benefit level.

Out-of-Network Care: In the event that a service is not available in network, St. Luke's Health Plan will review requests submitted through our waiver process to determine if approved at in-network benefit level.
